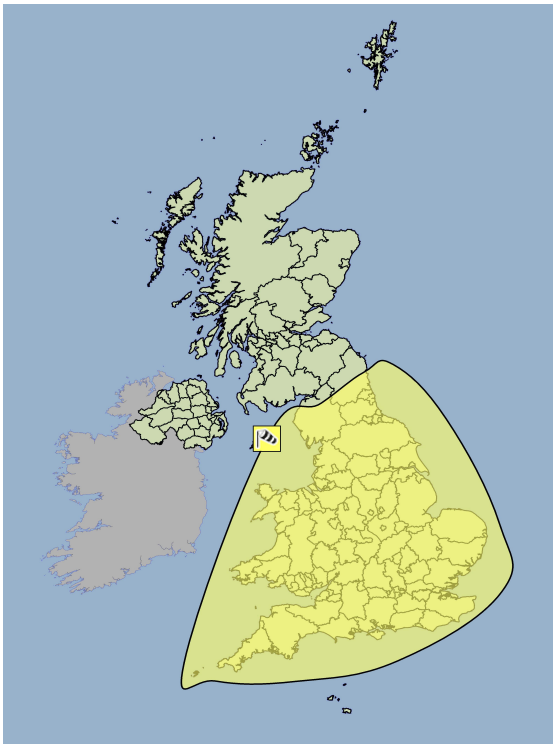
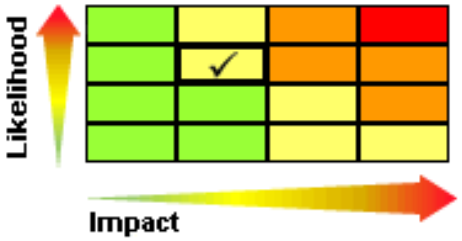
National Severe Weather Warning Service





Chief Forecasters Assessment
A low pressure system is expected to move east to the north of Scotland on Saturday, leading to strengthening winds across the UK but particularly across England and Wales. Latest indications are that gust strengths will be somewhat lower than previously expected.

The Met Office have issued a **Yellow Warning** of **Wind**

Valid from **10:30 on Sat, 28th Nov 2015** until **20:00 on Sat, 28th Nov 2015**

A blustery weekend is expected across England and Wales. Winds will continue to strengthen from the west on Saturday; gusts around coastlines exposed to the westerly or southwesterly winds could reach 60 mph in places, while inland gusts could touch around 50 mph locally.

This is an update of the warning issued on Friday, to slightly reduce the expected gusts on Saturday, and to separate Sunday, when stronger winds are still predicted.

Please be aware of the potential for very localised disruption due to the strong winds.
